

# The Learning Bank 2

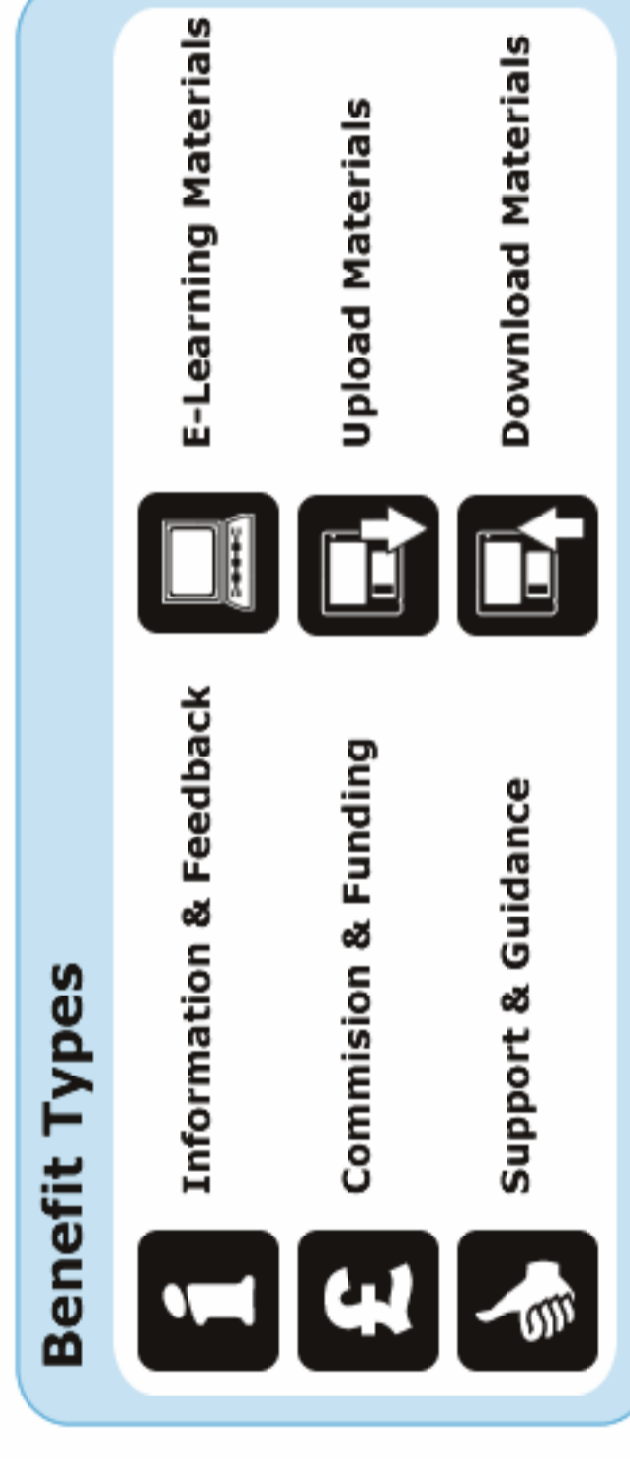

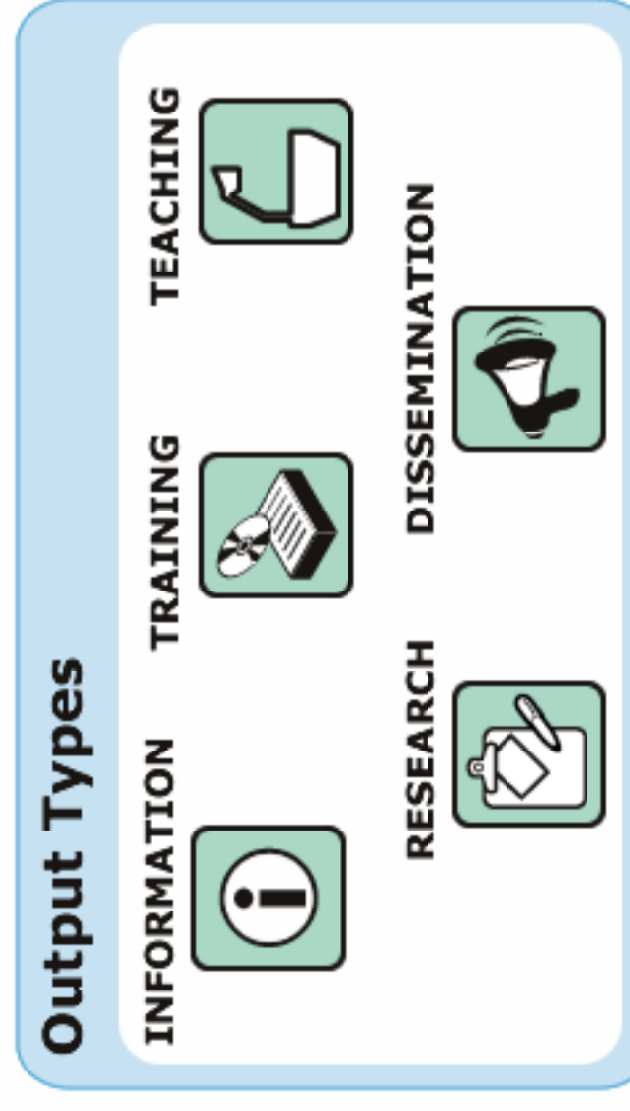

The Learning Bank  
A JISC funded project

A JISC funded Exchange for Learning: Phase 2 Project

The Learning Bank Phase 2 will produce and make available a range of learning objects (LOs) and learning object shells. It will also develop FE/HE capacity to implement three reuse and repurposing scenarios identified by the key role of the practitioner in the work flow process, namely tutors/learning support staff, information intermediaries and educational technologists. Each scenario incorporates x4L programme level issues such as resource discovery, learning design, tools, copyright and metadata.
